AI Hub Assemblies

Features and Benefits

- Mirrors OE design including taper bearings, ball bearings, ABS sensors and heat treatment
- Our factories improve upon the OE design where the product was under-engineered
- Made of the highest quality steel, SAE 1055 high carbon steel
 - Heat treatment process maximizes the steel strength and durability
- Meets stringent testing requirements to maximize reliability and performance
 - Life cycle and vibration testing are performed before going into production
 - OE 100% testing of all ABS sensors and critical components before it leaves the production line

Product Coverage

- Currently +650 active SKUs on hub assemblies
 - Also, 280 active SKUs on bearings and hubs
- We introduce approximately 50 new hub assemblies each year to ensure we have great coverage!

Factory Quality

- Manufactured to ISO/TS 16949 Quality System Standards; highest in the industry

Warranty

- Warranty policy is 12 months or 12,000 miles
