

TECH TIPS

SEVERE DUTY SHOCKS

WHEN SHOULD YOU CHOOSE SEVERE DUTY?

Autopart International's Severe Duty Shocks are specifically engineered for the demands of fleet and commercial customers. Our Severe Duty Shocks offer the fit of an OE, but have been over-engineered to have superior handling performance under heavy loads or extreme job site conditions. They are an upgrade to OE design and offer a superior ride no matter the extreme driving conditions they are put through.

To learn more about AI's Severe Duty parts, contact your local Autopart International store for details.
